How to remove paper stuck behind the paper cassette on the Konica Minolta 8 series.

Remove the cassette from the photocopier

first pull out cassette see pictures below.

Then on the left hand side of the cassette there is a green lever see picture below.

Then move the green lever to the lift as seen in picture below.

Then remove the cassette by lifting and pulling towards you.

When you have removed the cassette look inside and see if there is paper stuck it mite look like the picture below.

Reach inside and pull out the paper then put the cassette tray back and test the photocopier
